

Temperature Regulating Valve

Model 2470

Typical applications

- Engine and compressor cooling systems
- Cogeneration heat recovery systems
- Lube oil systems
- Two-way regulating of cooling circuits

Key benefits

- Tamper-proof temperature settings
- Simple operation
- Remote sensing capabilities
- Virtually no maintenance

Model 2470
Temperature Regulating Valve

Temperature Regulating Valve - Model 2470

Operation

The 2470 is a two-way temperature regulating valve with remote sensing to modulate or shut off flow resulting from temperature changes. It can be used to sense the regulating medium or another fluid.

The 2470 valve uses a highly reliable expanding wax element encased in a bronze retaining cup, which produces exceptional valve travel per unit of temperature change.

Where additional element insertion length is required, extensions can be added as shown in the How to Order tables on pages 4 and 5. Stainless steel wells are also available for use in corrosive environments or where fluid containment is necessary.

Model 2470B(-)1

Opens with a rise in temperature above the setpoint and will close on falling temperature. With a valve seat of Nitrile rubber, this unit, when fully opened,

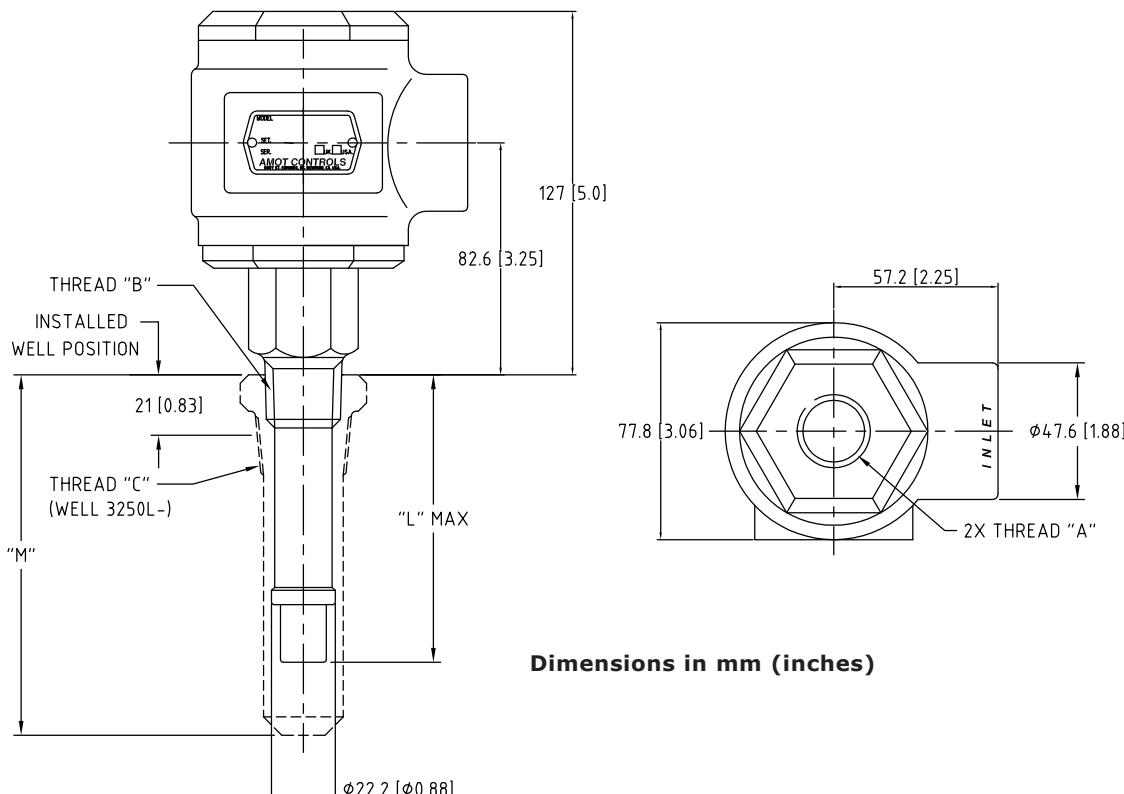

will withstand 8.6 bar (125 psi) water pressure with no leaking.

Model 2470B(-)3

Closes with a rise in temperature above the setpoint and will open on falling temperature. With a valve seal of Nitrile rubber, this unit, when fully closed, will withstand 8.6 bar (125 psi) water pressure without leaking,

To obtain maximum life from the temperature elements the valve must not be operated continuously at more than 10°C (50°F) above the opening point of the 2470B(-)1 or more than -1°C (30°F) above the closing point of the 2470B(-)3. If it is necessary to operate at a continuous over-temperature, consult the factory for alternative elements.

Dimensions

Temperature Regulating Valve - Model 2470

Flow Rate

Stainless Steel Well

Well installed depth dimensions (mm)			
Element installed depth - L	Well installed depth - M	Well part no.	Temp. element extension code
50	Not available	Not available	0
87	100	3250L014 (NPT) 40380L014 (BSPT)	3
100	113	3250L015 (NPT) 40380L015 (BSPT)	4

Models 3250L and 40380 stainless steel wells are available for the 2470 thermostatic valve. If valves and wells are ordered at the same time, they will be assembled at the factory using AMOT 40081 heat transfer compound.

When ordered separately, AMOT 40081 heat transfer compound should be ordered and inserted in the well before installing the 2470 valve. Sufficient compound should be used to fully cover the valve element extension.

Excess pressure due to compound expansion will be vented via the small relief hole in the 3250 well. If compound is not used, an excessive temperature lag between the sensed fluid and valve operating point may be experienced.

Temperature Regulating Valve - Model 2470

Specification

Body material	Cast iron	
Internal parts	Bronze	
Temperature element and extensions	Brass	
Adapter assembly	Stainless steel	
Dynamic seal	EPR	
Maximum pressure on element	55.2 bar	(800 psi)
Maximum pressure on well*	344.7 bar	(5000 psi)
Flow coefficient	K _v = 11.7	(C _v = 13.5)
Maximum shutoff pressure	2470B(-)1	8.6 bar Liquid (125 psi Liquid)
	2470B(-)3	8.6 bar Liquid (125 psi Liquid)
Net weight	2.1 kg	(4.6 lb)

Available Temperature Ranges

Use this table to select the desired temperature range code. Note the option of with or without a thermowell.

Temperature with thermowell				Temperature without thermowell				Code	
Open on rising		Close on rising		Open on rising		Close on rising			
Deg C	Deg F	Deg C	Deg F	Deg C	Deg F	Deg C	Deg F		
27	80	35	95	21	70	29	85	A	
35	95	46	115	29	85	41	105	B

Temperature Regulating Valve - Model 2470

How to Order

Use the tables below to select the unique specification of your 2470 temperature regulating valve.

Example	2470B	1	3	G	4	2	AA	Comments
								Basic Model
Basic Model	2470B							Cast Iron body
								Port Thread A/Install Thread B
								Port A
								Installation B
Thread		1						1" NPT
		3						1" BSP (PL)
								3/4" NPT
								3/4 BPS (Tr)
								Function
Function		1						Open on rising temperature
		3						Close on rising temperature
Temperature range	(see comments)							See Temperature Range Table for code
								Temperature element extension
								mm
								inch
Temperature element extension installed depth		0						50
		3						87
		4						100
								2
								3.44
								3.94
								Thermal well code
Thermal well code		N						Not fitted
		1						1" BSP (TR)
		2						1" NPT
		V						Calibrated in a well, not fitted
Special requirements	AA							Special requirements

If ordering in the USA use the table below:

Use the tables below to select the unique specification of your 2470 temperature regulating valve.

Example	2470B	1	3	G	4	-	Comments
							Basic Model
Basic Model	2470B						Cast Iron body
